

Test Scheduling Solution

End-to-end solution for scheduling COVID-19 tests

Supports local governments and organizations to quickly increase the number of testing sites and collect data faster to impact virus detection and spread.

Highly configurable and ready to **deploy in 2-3 days** with minimal training and no overhead. Pre-built **integration with EMR** solutions

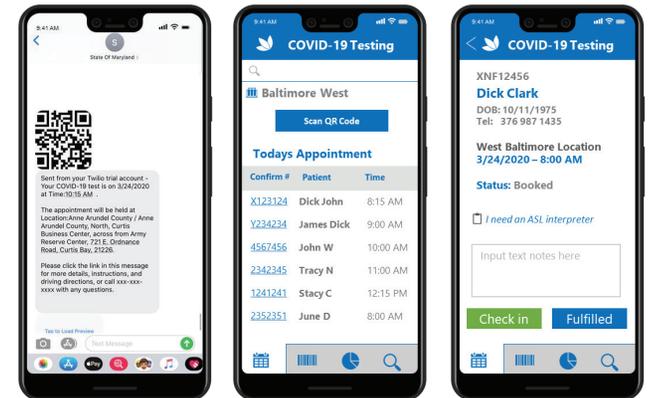

Integrated text messaging and simple **patient portal** provide **one-click scheduling** with location and time-slot options and a place to communicate personal needs.

End-to-end intelligent scheduling solution coordinates appointment availability with availability of testing sites, **testing kits** and resources. Includes built-in **appointment reminders** and wait-time notifications.

Phone app supports testing site processes, **patient tracking**, check-in, and **test administration**.

Enriching the human experience through innovation.
