

Transform the healthcare supply chain

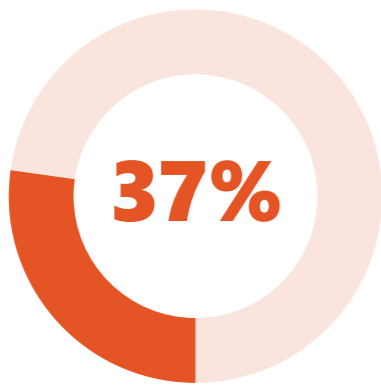

1 Solution. 5 Modules. Immediate Impact.

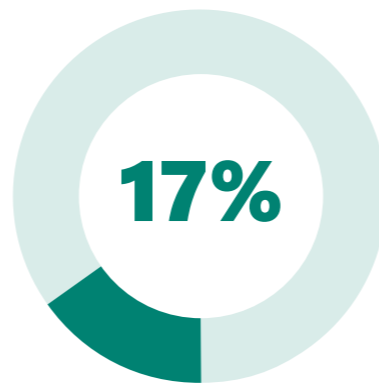

CareSupply provides efficiencies and cost savings, improved reporting, and fosters better-run healthcare organizations to provide superior patient care.

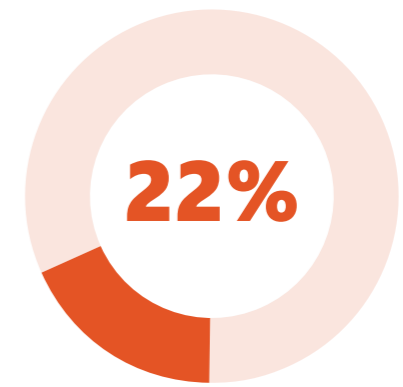

Supply chain costs consistently rank near the top for hospitals and healthcare systems, with predictions that they will finally surpass labor costs as its greatest expense in 2020¹

Supply chain costs for health systems average 37.3% of the total cost of patient care.²

Save an can average 17.7 percent or \$11 million per hospital annually by streamlining and standardizing their supply chain processes.³

In Nov. 2019, the average hospital spent \$12.1 million more than it needed to, an increase of 22.6% from just two years ago.⁴

Track & Trace

- Real-time visibility into where items are in the supply chain process
- Temperature controls

PAR Management

- Minimum and maximum number of units in inventory at a single time
- Set levels to automatically replenish inventory to keep at PAR level
- Reduce costs by not holding too much inventory on hand and reduce risk of stock item expiration

Materials Management

- Ensure facilities/departments are properly stocked with the right products and equipment
- Minimize inventory investment

E-procurement

- Automate labor intensive duties
- Improve workflows for procurement
- Increase visibility of purchasing behavior
- Connect to ERP for realtime data and information sharing

Vaccination Management

- Track the lifecycle of vaccine lot/serial number end to end from receiving to internal transfers to administering the vaccine
- Centralized dashboard to improve efficiencies through automation, real-time reporting and just-in-time delivery
- Replenish and oversee inventory levels at clinics, departments and vaccine stations

Objectives of An Optimized Supply Chain Process:

- Deliver improved patient care experiences
- Reduce administrative time on manual tasks
- Improve clinician and supplier relationships
- Strengthen supply chain bonds between hospitals and suppliers
- Maximize inventory investment
- Mitigate impacts of future pandemics
